

[Interstellar-Demolition-Game]

A destructible-terrain space bullet hell shooter Game. Built with **Three.js**

Overview

Interstellar Demolition Office is a browser-based game where players blast through destructible mineral voxels to expose hidden enemy facilities.

Tactical Gameplay

Players must scavenge debris to collect Gold shards for weapon energy and Crystal shards for health, ultimately clearing surface threats to unlock and eliminate the heavily fortified planetary core.

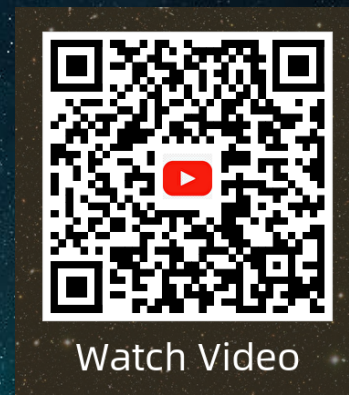

Marching Cubes Algorithm

Powered by the Marching Cubes algorithm for real-time 3D mesh deformation.
